Q34. We find that many people participate in politics in other ways besides voting. Since January 2020, please tell us if you have done any of the following political activities to support a candidate, political party, political group or political issue. Select all that apply.

	<i>Black</i>	<i>Asian</i>	<i>Latinx</i>	<i>White</i>	<i>Total</i>
	%	%	%	%	%
Participate in a protest	14	9	10	12	12
Attending a meeting, rally, speech, or dinner	10	5	7	7	8
Wearing a campaign button, putting a campaign sticker on your car, or placing a sign in your window or in front of your home	12	8	10	8	9
Expressing your opinion (either positive or negative) about politics through social media sites such as Facebook or Twitter	26	17	21	29	26
Raising or donating money <u>online</u> (via website, Facebook, text, etc.)	10	11	8	10	10
Raising or donating money through <u>offline</u> methods (check, donations at an event, etc.)	6	8	5	3	5
Starting or joining a political group on a social networking site	7	4	9	7	7
Starting or joining a political group that is primarily not online	5	5	5	4	5
Signed a petition	29	21	23	26	26
Contacted a public official	8	8	7	12	10
Shared or circulated news and other information about recent political events on social media (like Facebook or Twitter) or through email	24	17	18	23	22
Talking to friends and/or family about the election	48	58	47	58	54
SKIPPED / REFUSED	8	16	14	14	13
N	798	436	824	1,015	3,124

Q35A. Please indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statement. I believe that by participating in politics I can make a difference.

	<i>Black</i>	<i>Asian</i>	<i>Latinx</i>	<i>White</i>	<i>Total</i>
	%	%	%	%	%
Strongly agree	31	19	25	22	23
Somewhat agree	41	49	44	46	45
Somewhat disagree	17	25	21	22	21
Strongly disagree	10	5	9	9	9
SKIPPED / REFUSED	1	2	1	1	1
N	798	436	824	1,015	3,124

Q35B. Please indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statement. I have the skills and knowledge necessary to participate in politics.

	<i>Black</i>	<i>Asian</i>	<i>Latinx</i>	<i>White</i>	<i>Total</i>
	%	%	%	%	%
Strongly agree	31	19	21	29	27
Somewhat agree	36	44	41	38	39
Somewhat disagree	21	26	25	23	23
Strongly disagree	10	9	10	10	10
SKIPPED / REFUSED	1	2	3	1	1
N	798	436	824	1,015	3,124

Q35C. Please indicate whether you strongly agree, somewhat agree, somewhat disagree, or strongly disagree with the following statement. The leaders in government care very little about people like me.

	<i>Black</i>	<i>Asian</i>	<i>Latinx</i>	<i>White</i>	<i>Total</i>
	%	%	%	%	%
Strongly agree	39	22	34	28	31
Somewhat agree	39	50	43	45	44
Somewhat disagree	15	23	15	21	19

STUDY METHODOLOGY

The GenForward October survey is a project of Professor Cathy J. Cohen at the University of Chicago. Interviews were conducted with a representative sample from GenForwardSM, a nationally representative survey panel of adults ages 18-36 recruited and administered by NORC at the University of Chicago.

A total of 3,124 interviews were conducted between October 6th and October 21st, 2020 with adults ages 18-36, including completed interviews with 798 African American young adults, 436 Asian American young adults, 824 Latinx young adults, 1015 White young adults, and 51 young adults with other racial and ethnic backgrounds. The survey was offered in English and Spanish and via telephone and web modes.

The GenForward survey was built from two sample sources:

- Fifty-five percent of the completed interviews are sourced from NORC's AmeriSpeak® Panel and from the Black Youth Project (BYP) panel of young adults recruited by NORC. AmeriSpeak is a probability-based panel that also uses address-based sample but sourced from the NORC National Frame with enhanced sample coverage. During the initial recruitment phase of the AmeriSpeak panel, randomly selected U.S. households were sampled with a known, non-zero probability of selection and then contacted by U.S. mail, email, telephone, and field interviewers (face-to-face). The BYP sample is from a probability-based household panel that uses an address-based sample from a registered voter database of the entire U.S. Households were selected using stratified random sampling to support over-sampling of households with African Americans, Latinxs, and Asian Americans ages 18-36. NORC contacted sampled households by U.S. mail and by telephone, inviting them to register and participate in public opinion surveys twice a month.
- The AmeriSpeak panel sample was supplemented with respondents from the Dynata nonprobability online opt-in panel. Forty-five percent of the completed interviews are sourced from the Dynata panel. To help to reduce potential bias in the nonprobability sample, Dynata attempted to balance the nonprobability respondent sample by age, race and ethnicity, gender, and partisanship. In order to incorporate the nonprobability sample, NORC used TrueNorth calibration services, an innovative hybrid calibration approach developed at NORC based on small area estimation methods in order to explicitly account for potential bias associated with the nonprobability sample. The purpose of TrueNorth calibration is to adjust the weights for the nonprobability sample so as to bring weighted distributions of the nonprobability sample in line with the population distribution for characteristics correlated with the survey variables. Such calibration adjustments help to reduce potential bias, yielding more accurate population estimates.

Panelists on both the BYP and AmeriSpeak panels are invited to register for the panel via the web or by telephone to participate in public opinion surveys.

Of the 3,124 completed interviews in the GenForward October survey, 98 percent were completed by web and 2 percent by telephone. The survey completion rate is 18.5 percent. The weighted AAPOR RR3 panel recruitment rate is 11.2 percent and the weighted household panel retention rate is 88.3 percent, for a cumulative AAPOR Response Rate 3 of 1.8 percent. The overall margin of sampling error is +/- 2.44 percentage points at the 95 percent confidence level, including the design effect. Among subgroups, the

margin of sampling error at the 95 percent confidence level is +/- 4.50 percentage points for African Americans, +/- 5.98 percentage points for Asian Americans, +/- 5.29 percentage points for Latinxs, and +/- 3.60 percentage points for Whites. The margin of sampling error at the 95 percent confidence level is +/- 3.34 percentage points for Democrats, +/- 4.64 percentage points for Republicans, +/- 5.45 percentage points for Independents.

To encourage cooperation, respondents were offered incentives for completing the survey that ranged from the cash-equivalent of \$3 to the cash-equivalent of \$10.

The interviews from the two probability-based sample sources were combined for statistical weighting and analysis. The combined panel samples provide sample coverage of approximately 97% of the U.S. household population. Those excluded from the sample include people with P.O. Box only addresses, some addresses not listed in the USPS Delivery Sequence File, and some newly constructed dwellings. The statistical weights incorporate the appropriate probability of selection for the BYP and AmeriSpeak samples, nonresponse adjustments, and also, raking ratio adjustments to population benchmarks for 18-64-year-old adults. A poststratification process is used to adjust for any survey nonresponse as well as any non-coverage or under- and over-sampling resulting from the study-specific sample design. The poststratification process was done separately for each racial/ethnic group and involved the following variables: age, gender, education, and census region. The weighted data, which reflect the U.S. population of adults ages 18-36, and the 18-36-year-old populations for African Americans, Latinxs, Asian Americans, and non-Latinx whites, were used for all analyses.
